IT314 – Software Engineering

Group 22 – Fingenie

AI – Powered Balance Sheet Analysis Tool

Requirements Not Completed

Team Members:

Name	Student ID
TANDEL DHRUVINEE DINESHKUMAR	202301203
MEET RUPESH GANDHI	202301219
PRIYANKA GARG	202301262
JAYADITYA SHAH	202301254
CHHABHAYA MANAN KETANBHAI	202301222
GAADHE JAYANSH MANUBHAI	202301232
VORA KRESHA MANOJBHAI	202301231
RATHOD AJAYKUMAR VALLABHBHAI	202301221
CHAUDHARI RUTU RAHUL	202301235
NAKUM AYUSH VIJAYBHAI	202301233

Requirements Not Completed / Implemented:

1. **Forgot password Module:**

The feature about forgot password was not added in authentication due to a time crunch and the time complexity associated with it. We tried to add the functionality, but no positive outcome was achieved.

2. **Credit score integration:**

The backend working for credit score is ready, but is not tested for anomalies, and integration to the main site is remaining due to a time crunch.

3. **Balance sheet configuration:**

The feature of balance sheet comparison lets you compare financial PDFs for 2 companies. The frontend and backend are ready, along with testing, but integration of the backend with the frontend and with the main site is pending due to a time crunch.

4. **Profile Page Integration:**

The frontend and backend are ready, along with testing, but integration of the backend with the frontend and with the main site is pending due to a time crunch.

Summary:

We have tried to add as many functionalities and features while distributing workload evenly among all the group members, but time and our capability of working and organizing something equivalent to industry level became our bottleneck. We learned a lot about how a project runs on an industry level and how integrating everything and making a consumer-ready product is difficult.
